EDUCATION

New Jersey Institute of Technology, Albert Dorman Honors College

May 2027

Bachelor of Science in Computer Science, Minor in Mathematics + Business

Newark, NJ

- GPA: 3.93 | Honors Merit Scholarship (Full Tuition)
- Relevant coursework: Data Structures & Algorithms, Compiler Design, Generative AI, Machine Learning, Database Management, Linux and C programming, Network Security, Operating Systems, Linear Algebra

SKILLS & SOFTWARE

Technical Skills: Python, Java(Spring Boot), C++, HTML, CSS, JavaScript, SQL, MongoDB, Bash, Linux, Agile software development

Software: Anaconda, WSL, LaTeX, Xampp, Minitab, Git, Bitbucket, Visual Studio, Postman, Jira, Confluence, Docker, AWS, MCP

EXPERIENCE

Prudential Financial - Containers and DevOps

Sept 2025 - Present

Software Engineering Intern

Newark, NJ

- Designed an **AWS Bedrock** chatbot using **Lambda** and **boto3** to deliver insights and create new **EKS, EC2, and S3** resources.
- Built an **MCP** server connecting Bedrock agents with **Kubernetes** APIs to automate clusters and namespaces for **150+** teams.
- Deployed **Bedrock** agent and action groups using **Terraform** to enable organization-wide accessibility across **AWS environments**

TD Securities - Risk Management and Product Control

June 2025 – August 2025

Software Engineering Intern

New York City, NY

- Reduced **14K** risk mappings to **~100 regex-based patterns** through data analysis, streamlining risk attributions across TD systems.
- Leveraged **Java Spring Boot** to monitor **80+** critical APIs over **REST and ZeroMQ**, with a **real-time UI** for actionable insights.
- Parallelized API checks and trade metric validation (NPV, PnL) using a **multithreaded pipeline**, reducing execution time by **~70%**.
- Employed **Protobuf** to decrease latency by **52%** and streamline cross-platform communication across **4+ backend services**.

Office of Naval Research / Big Data Analytics Laboratory

Feb 2024 – Dec 2024

Machine Learning Intern / Honors Research Fellow & Grant Recipient

Newark, NJ

- Utilized Machine Learning skills to help the US NAVY predict ship maintenance delays and optimize resource allocation.
- Enhanced model accuracy by **80%**, reducing predictive errors to **14 days** and saving the U.S. Navy over **\$1 billion** in costs.
- Analyzed over **15k** classified features, providing data-driven recommendations on model functionality for U.S. Navy officials.
- Reduced overfitting by **20%**, while increasing accuracy by **10%** through a custom algorithm harmonizing ML output.

Tech for Good Inc.

July 2024 – Sept 2024

Software Engineering Intern

Boston, MA

- Engineered an **openEHR-compliant EMR system** in **Go** to digitize rural patients' records, initially deployed in Tanzanian Hospitals.
- Designed and implemented a **ScyllaDB** schema with **5000+** records, exposed via performant **GraphQL API endpoints**.
- Implemented **Docker** to ensure consistent database and language schemas across local machines for all team members.

PROJECTS

SentiStock - Flask, Hugging Face(FinBERT and BART), SerpAPI, DiffBot, HTML/JS

- Built an **AI-powered** stock sentiment analyzer using **FinBERT** and **BART** for financial text classification and summarization.
- Integrated **SerpAPI** and **DiffBot** for live news retrieval and analysis, delivering transparent **buy/hold/sell** insights via a web UI.

WasteFree - Kolang, Python, SQLite, Mindee-API, Beautiful Soup, Bcrypt

- Built a **Kolang** system to track pantry inventory, send expiration alerts, and suggest user-endorsed recipes to reduce food waste.
- Integrated **Mindee API** to extract items from grocery receipts and update a normalized **SQLite database** for pantry updates.

PayPark - (Columbia DivHacks '25 - 3rd Place Overall/Best Financial Hack by Capital One/Best Use of XRP Ledger/Most Popular Hack)

- Engineered a full-stack architecture using **Next.js**, **Express.js**, **FastAPI**, and **Prisma** for a seamless UI and efficient operations
- Integrated **XRP Ledger (RLUSD)** for automated token issuance for parking payments, wallet sync, and transaction tracking
- Utilized **TomTom API**, **WebSocket services**, and **Echo AI** for live parking data information, pricing, and session management.

LEADERSHIP EXPERIENCE & AFFILIATIONS

CodePath - Community Member & Student

Feb 2025 - Present

Governor's STEM Scholars - Project Lead

Sept 2025 - Present

Bergen County Debate Club - Coach & Alum

Sept 2021 - Present
